MEASUREMENT STEPS

A guide by Kohira Jewelry

Option 1: Measure an Existing Ring

- Take a ring that fits comfortably on the intended finger.
- Measure the inner diameter using a ruler (in millimetres)
- Match your measurement with our ring size chart below

Option 2: Measure Your Finger

Step 1: Cut a thin strip of paper or use a soft measuring tape.

Step 2: Wrap it around the base of your finger (not too tight or too loose).

Step 3: Mark the point where the paper overlaps.

Step 4: Measure the length in millimetres with scaler and compare it with our size chart.
